SUMMARY

Quality Assurance professional with nearly three years of experience in manual and automated testing across web, mobile, and desktop applications. Experienced in Agile environments, collaborating closely with developers and product managers to ensure software quality and readiness for release. Strong in test design, defect reporting, and documentation, with hands-on experience in automation and API testing. Detail-oriented, proactive, and committed to continuous skill development.

WORK EXPERIENCE

QA Staff

CV. Newtronic Solution — Bandung, Indonesia (On-site)

June 2024 - Present

- Reviewed requirements, specifications, and technical designs to identify test coverage and potential risks.
- Designed and executed manual and automated test cases for web, mobile, and desktop applications
- Documented and reported defects clearly using Jira and Confluence, ensuring effective communication with development teams.
- Developed UI automation scripts using Selenium and Robot Framework to support regression testing.
- Conducted basic API, performance, and database validation using Postman, JMeter, and Dbeaver (MySQL, PostgreSQL)
- Project: Queuing Management System

Quality Assurance Analyst

PT. Winosa Mitra Bharatadjaya — Lampung, Indonesia (Hybrid)

(December 2022 - April 2024)

- Took end-to-end responsibility for software testing, including test planning, execution, and reporting
 - Created and maintained test cases, test scenarios, and user guides in English
 - Executed regression testing and developed automation scripts using Selenium with Robot Framework
 - Collaborated with cross-functional teams to validate fixes and ensure release readiness
 - Projects: Xdemia (xdemia.com), Truexess (truexess.com)
-
